Rail Operations & Compliance Consulting

With over 20 years' experience across standard gauge mainline and heritage railways, narrow gauge systems, and leisure park operations, I provide practical, real-world rail consulting that works on the ground—not just on paper.

I remain actively involved in daily railway operations, managing my own railways and holding a senior role on a standard gauge heritage line. Meaning my advice is current, regulator-aware, and proven in live operating environments.

Services include:

- Safety, Compliance & Maintenance Management Systems (SMS, CMS, MMS)
- System development, review, auditing, and continuous improvement
- Practical project and development support
- Competency frameworks and assessments
- Railway asset and operational valuations

Whether you're developing a new operation, improving compliance, preparing for audit, or delivering infrastructure and rollingstock projects, I offer clear, practical guidance backed by years of hands-on experience.

Get in touch to discuss your project, challenges, or compliance needs.
